PREFACE

The records included here were copied from Book 2 of the Jefferson County Death Records. During these years (1888-1898) the records covered the entire county - there were no city records being kept as there are now. However, during this period some deaths may not have been recorded.

It has been our purpose to compile these records in a form that would make the location of a specific record easier for the genealogical searcher. Since the originals were organized on a yearly basis, it was necessary to know when a person died in order to locate the record of death. We have therefore placed them in alphabetical order.

The information given in the original ledgers is arranged in columns on facing pages. Given on the right hand page were: occupation, name of father, name of mother, color and place of residence. Very often many of these items were not given. Sometimes the clerk missed the line when passing to the other side of the book, causing information to be misplaced. In many cases this was found and corrected but often it was not. If a question exists regarding an entry...and I have often underlined contradictory data...it would be best to refer to the original ledger.

Many entries in this book were duplicated, perhaps reported by more than one person. If these duplications were identical, I merely noted the location of the duplication. However, if they differed I included both as they were written.

Utmost care was used throughout the copying of this book to ensure accuracy and I sincerely hope that my readers will find this to be so, and will find as well that the book is useful in their research.

Leila S. Francey

Each name contained here is followed by a number .

Example: Mary Ann Kenyon (1-12-17)

The first number...1... indicates Volume 1.

The second number...12...indicates page 12.

The third number...17...indicates entry #17.
